Charlies Foundation *for Research*

Charlies Foundation *for Research* is the peak fundraising body for the Sir Charles Gairdner and Osborne Park Health Care Group, raising funds for patient-centred research.

Funding new and emerging research is critical and we are seeking your help in supporting this important work.

Our hospitals are well known in the specialist fields of emergency medicine, cancer, heart disease, lung disease, liver disease, orthopaedics, osteoporosis and many others.

Getting Better Together is our organisational motto and encapsulates what we do and what we want to achieve.

We aim to bring together allied health professionals, nurses, doctors and scientists in the context of translational and complementary research.

Donations received by the Foundation are channelled via a number of funding pathways into the hospitals to support research projects and activities.

The Foundation also supports the purchase of specialised equipment in the hospitals when specifically requested by donors.

The Foundation has a long and proud relationship with Sir Charles Gairdner and Osborne Park hospitals spanning almost 30 years.

In that time, millions of dollars have been spent funding new and exciting projects, programs and initiatives.

At Charlies Foundation *for Research* we are dedicated to supporting and advocating world-class patient-centred research, which is crucial to the prevention of disease, to the relief of the suffering and to improved patient outcomes for all Western Australians.

Research is the cornerstone of improving patient care – and Charlies Foundation *for Research* provides funding towards this essential service.

There are several ways you can support the Foundation to continue this important work.
