

## ECU Explorer Grant 2022 – 2023

Edith Cowan University (ECU) and Charlies Foundation for Research have collaborated to create the new ECU Explorer Grant for 2022.

The inaugural ECU Explorer Grant offers funding for a short-term research project to be conducted in the Sir Charles Gairdner Osborne Park Health Care Group (SCGOPHCG) and completed within the 24 months.

The purpose of this grant is to support innovative health research via a collaborative partnership between SCGOPHCG and Edith Cowan University that has the potential to change clinical practice for the improvement of the health and wellbeing of the community.

This grant initiative encourages the development of preliminary data for a subsequent collaborative application by the investigators to a national or international competitive granting body.
